and the
Building Code of Australia 2011**

SPRING RETURN SIGNPOST

TP140203 + Parking Sign

The patented Spring Return Signpost system transforms a standard signpost installation into a, full 360 degree impact recovering, passive safe signpost installation. Spring Return Sign Posts will always return to vertical after impact with the sign still in the correct orientation.

Red spring units are designed for use with tall steel signposts up to **2.8m** tall.

Spring Return Signpost saves \$\$\$ by protecting both the installation, the vehicle and the driver from damage.

PRODUCT DETAILS

Product Reference: TP140203

- Ø60mm Diameter Post
- Height 2800mm
- Made from Steel
- Base Finish - Galvanised

SPRING RETURN BOLLARD

LRB003

This Bollard has been specifically designed for Disabled Car Parking Spaces. At 1.3m high it is fully compliant with AS 2890.-2009

Spring Return Bollards impact recovering features minimise damage from impact 3 ways:

- Minimise Site Damage
- Minimise Product Damage
- Minimise Vehicle Damage

Spring Return Bollards save \$\$\$ and recover their cost after the first impact.

PRODUCT DETAILS

Product Reference: LRB003

- Ø150mm Diameter
- Height 1300mm
- Base Finish - Galvanised
- Bollard Finish - Safety Yellow
- Surface Mount Installation (*standard*)

How They Work!

1

The Spring Return Bollard or Signpost before impact

2

Upon impact the Spring Return Products will simply yield, minimising product, kerb and vehicle damage.

3

Spring Return Products will then return to vertical once vehicle moves forward
